District Mission Statement

It is the mission of the Hillside Board of Education to ensure that all students, at all grade levels achieve the New Jersey Student Learning Standards make connections to real-world success. We are committed to strong parent community school partnerships, providing a safe, engaging, and effective learning environment and supporting a comprehensive system of academic and developmental support that meets the unique needs of each individual.

Academic Area Overview

Social Studies, as defined by the National Council for the Social Studies, is “the integrated study of the social sciences and humanities to promote civic competence.” The primary purpose of the Hillside social studies program is to provide an academically rigorous environment that produces active critical thinkers and productive, civically competent, participants in our society. Students are given the opportunity to develop their own sense of place in our community, state, nation and global village. Students will pursue individual goals and challenges as they develop an understanding of self, the diverse community of which they are a part and their connection to the goals and interests of the global community and planet earth.

Students will study history, citizenship/political science, geography, economics, anthropology, sociology, and the humanities as prescribed by the New Jersey State Core Curriculum Content Standards in Social Studies. As they study the human condition in these contexts, they will gain an understanding of their own country’s history, institutions and environment. They will also apply their knowledge to understand the forces that have shaped world cultures. Students will learn to view contemporary problems facing the nation and the world as products of complex historical, institutional, and environmental processes. Students will discover their own individuality and the contributions they can make to society. They will know what they should strive to become and their role as responsible and productive individuals who possess civic competence

Equality and Equity in Curriculum

The Hillside Township School District ensures that the district’s curriculum and instruction are aligned to the State’s Core Curriculum Content Standards and addresses the elimination of discrimination and the achievement gap, as identified by underperforming school-level AYP reports for State assessment, by providing equity in educational programs and by providing opportunities for students to interact positively with others regardless of race, creed, color, national origin, ancestry, age, marital status, affectional or sexual orientation, gender, religion, disability or socioeconomic status.

N.J.A.C. 6A:7-1.7(b): Section 504, Rehabilitation Act of 1973; N.J.S.A. 10:5; Title IX, Education Amendments of 1972.

UNIT I: Classical Civilizations: Ancient Greece and Rome (1000 B.C. to 600 A.D.)

ENDURING UNDERSTANDINGS	ESSENTIAL QUESTIONS
<ul style="list-style-type: none"> Centralized governments and strong trade systems helped create extensive empires. The promotion of a common culture and social values enabled the classical empires to flourish. As commerce was promoted, cultures exchanged ideas and goods with one another. Religion and mythology shaped the values of the classical societies. Cultural exchange and diffusion led to the spread of religions that continue to exist today. The classical civilizations have several common causes that led to their decline. <p>Classical civilizations have had long term impacts on societies continuing through modern society.</p>	<ul style="list-style-type: none"> 6.3.8.D.1. How are conflicting points of view addressed within a democratic society? 6.2.8.A.3.a. How did the use of philosophies help empires unify their people? 6.2.8.B.3.a. Which geographical features of each empire affected the cultural systems of classical societies? 6.2.8.C.3.b. How did civilizations develop organized systems of trade? 6.2.8.D.3.e. How did religions develop and spread throughout the classical age? 6.2.8.D.3.f. In what ways did the various belief systems influence life in classical societies? 6.2.8.A. 3 .a. What different methods did rulers use to control and unify empires? 6.2.8. B.3 a. What was the role of geography in the expansion of empires? 6.2.8.C.3.a. How did land and sea trade routes impact the growing empires? 6.2.8.D.3.a. How did social hierarchies reflect the wealth, power and treatment of people within the empire?

- 6.2.8.B.3.b In what ways did geographical features lead to the decline of classical civilizations?
- 6.2.8.C.3.c. How did the military expansion of some empires lead to the demise of other empires?
- 6.2.8.D.3.c. Which common factors led to the decline of Rome and Greece?
- 6.2.8D.3.d. What were the legacies of each classical civilization?
